

Covid Requirement Guidelines

For internal and student use.

- *Upload your requirements documentation to ACEMAPP.*

To fulfill the Covid requirement, you should upload proof of prior vaccination to Covid-19 to ACEMAPP.

Exemptions:

Nursing students who decline to be vaccinated for non-medical reasons are putting themselves, and more importantly the patients they care for, at risk. Many people die each year from the Covid, and vaccinations are a powerful way to demonstrate the professional ethic of altruism.

Health care workers who choose not to be vaccinated, but to instead rely on others to provide herd immunity, may not be demonstrating the highest level of professional practice.

Any nursing student who declines to be vaccinated against Covid for non-medical reasons is required to contact the Center for Clinical Excellence team (clinical@up.edu) to request for a declination form. The student must upload the signed declination form in place of vaccination documentation by requirement deadlines.

It is not the School of Nursing & Health Innovations' responsibility to ensure that a clinical site is able to accept students not vaccinated for non-medical reasons. Unvaccinated students may not receive make-up clinical time for Covid-related absences.
