

Nursing Student Partnership Award:

Many of our nursing students and clinical groups nominated our RGH nurses & team members last semester for the Nursing Student Partnership Award. The Nursing Student Partnership Award was created to recognize Rochester General Employees who go above and beyond in supporting our nursing students. These individuals play a vital role in fostering exceptional learning environments and providing personalized educational opportunities. Once the person is identified as an award recipient, me, our CNO, and the recipient's leadership gather a huddle on their unit where their nomination is read aloud in front of their peers. They also receive an award and letter of recognition, and gift. This made an exceptional impact on our staff last semester and their partnership with your students.

If you or your students want to nominate a nurse, PCT, respiratory therapist, NP, MD, **or any staff member** for this award throughout the semester- please write up a few sentences about why you are nominating this person and submit to me.
