

Tdap Requirement Guidelines

For internal and student use.

- *Upload your requirements documentation to ACEMAPP.*
 - The Tdap vaccination protects against tetanus, diphtheria, and bordatella pertussis (whooping cough).
 - The Td vaccination protects only against tetanus and diphtheria.
 - Everyone must have a Tdap vaccination initially and is good for ten years. Follow-up boosters may be either the Tdap or Td.
-

To fulfill this requirement, you must:

1. Receive a Tdap vaccination on or at some point after your 11th birthday.

AND, if your most recent vaccination or booster is more than 10 years old

2. You must receive a Tdap booster OR Td booster.

Exemption: *A student is exempt from this requirement if deemed allergic to the vaccination. Documentation of this allergy from a healthcare provider is required and may impact professional practice placements and necessitate additional precautions.*
