

Drug Screening Requirements Guidelines

For internal and student use.

- You must activate your AdvantageStudents account before you can order your drug screening. (The CCE Team will send you instructions early in your fall semester, sophomore year).
- Once your activated Complio account is approved by the CCE Team, Complio will email instructions on how to complete your drug screening.
- *Results are automatically uploaded when ordered through Complio.*

To fulfill this requirement, you must: Pass the drug screening.

- SONHI pays for the initial drug screening when ordered through AdvantageStudents.
- Failure to follow these instructions and other instructions from AdvantageStudents may result in additional charges which will be the responsibility of the student.
 - Limit fluids to 12 ounces, four hours prior to screening.
 - Go to the lab specified on the authorization form.
 - Bring the authorization form as proof of payment.

The drug screening must be repeated if BSN program progression was interrupted for 12 months or more.

If a student fails a substance screening, or if there is suspicion of substance abuse, SONHI will follow the guidelines under the “Substance Abuse and Substance Abuse Testing Policy” section of the BSN Student Handbook.

If a student refuses to submit to a substance screening, the student will be dismissed from the SONHI.
